Product description
Transformer Oil BSI is an efficient performance non-inhibited electrical insulating oil, suitable for use where insulating oils meeting IEC 60296:2003 or ASTM D3487 Type I transformer oil specifications are required.

It is formulated with highly refined naphthenic base oil and does not contain polychlorinated biphenyls (PCBs).

Customer benefits
• Low viscosity and low pour point provide good low temperature fluidity
• Efficient heat transfer improves transformer component cooling
• Low solvency protects electrical wire enamels
• Rapid arc quenching reduces contact erosion
• High dielectric strength and low dissipation provide good insulating characteristics
• Highly refined base fluids resist sludge, deposits, soluble compounds and the breakdown oil electrical properties

Applications
• Transformers
• Oil-immersed switchgear
• Circuit breakers
• Oil-filled capacitors
• Tap changers
• Electrical reclosures
• Fuses
